

Modern Earth Building 2005

International Conference

18 to 20 November 2005

To enhance the international co-operation and the transfer of knowledge about earth construction, Umbra GmbH organizes the international conference Modern Earth Building 2005 in Berlin. The aim of the conference is the idea of working together and learning from one another in an international context.

The business field of earth building products is increasing in the last years and new technological developments can be presented. First steps of certification of earth plasters with the new European label for sustainable building products "natureplus" are done.

In a basic lecture about earth plasters you will be informed about their characteristics and changes caused by additions, handling and surface treatment. The process and the requests to get the seal of quality "natureplus" for earth plaster will be explained. The decision to use earth building products in the new office of the Federal Environmental Agency in Dessau emphasize the sustainable aspects for the future development.

Furthermore you will be informed about new products and technical developments and get a widespread knowledge about modern earth building.

On the exhibitions you will have the possibility to be informed about new modern earthen architecture.

We welcome you on the conference in Berlin!
